PROPOSED MEMORIAL HALL, STRATHMORE.

Remember The Fallen

HELP THE VETERANS TO COMPLETE THE MEMORIAL HALL

It will be a year on the 15th of this month since the Treaty of Versailles was signed, and Germany finally acceded to the terms of her conquerors.

The victorious conclusion of the war was only rendered possible by the men who died on the battlefields, and of those who were in the fight and came through, some whole, and some maimed. Men from this district took their part in the Great Adventure. The men who enlisted from around the district amounted to over one hundred and fifty, and the dead unfortunately, are more than can be counted on the fingers of two hands. But could we give the names of those men who have died for us if we were asked to do so?

There should be an enduring monument in our midst to commemorate the memory of these men, so that it will be handed down for a hundred years hence to those who will benefit by their sacrifice.

The Strathmore Great War Veterans Association has an ambitious project on hand to commemorate these men in the erection of a building which will be a Memorial Hall, containing an enduring scroll of the departed and of those who fought, and will also serve the purpose of a community hall and veterans club. They have met with a generous response so far as they have gone, about \$7,000 having already been raised in cash and reliable promises, but owing to the severe winter, which blocked the roads, and a late spring, which made it impossible to proceed with the carvase while seeding operations were on, it has been left to the present month to complete the carvase. It is proposed to devote a week during this month to the carvase, and an effort will be made to cover the district thoroughly during that time.

Offers of assistance will be welcome, and also voluntary contributions, for the veterans are mostly men who are busy re-establishing themselves, and whose time is limited.

To those who read this article we appeal to you to give to the limit of your power and purse, remembering the object for which you are giving. Help to swell the funds so that the Memorial may be built this year.

Mr. H. H. Forward is the treasurer of the building fund. He is assisted by Mr. W. E. Brown's store. Mr. Douglas French, President of the Strathmore G.W.U., is the chairman, and Mr. John Macgregor is secretary. All the above will be glad to accept contributions or offers of help in the carvase.

Drowning Fatality

On Sunday, July 4th, John Edward Westlake, eldest son of Mr. Westlake who was staying at the house of Mr. Reynolds, four miles west of Ardenode, was drowned in a slough within a few hundred yards of their home. The slough is on the other side of the railway from the house, and the boy had signified his intention of going out for a bath. The boy with a number of others went out before midday to the slough, which is out of view from the house, being cut off by the railway embankment. None of the other boys would go in, but the deceased went in and slipped down over his head. It was more than half an hour before he could be pulled out, and was found in place that eight feet of water. He drifted was drowned, but it was too late for medical assistance to be of any avail.

The funeral service will take place at St. Michael's church on Tuesday, and the burial will be at Strathmore Cemetery.

The sympathy is felt with the parents in their bereavement.

King Edward Grill Opening

The opening of the old bar at the King Edward will be revived when it is reopened as an tavern and eat and drink parlor in connection with the King Edward Grill. Both the bar and the large room adjoining it have been refitted and renovated, and renovated made with the hotel kitchen, so that it will make a really up-to-date restaurant.

While the bar will be largely light and airy, and the new bar is still there, and the comfort all wears the atmosphere of the old bar, it is not to be so well illuminated as of yore, but still there will be no "moonlight at the bar" of the quality of the drinks. The grill will have and his highest artists will perform.

The proprietor of the King Edward Grill and Ice Cream Parlor as Mr. H. Williams, one of the "Boys" formerly of the Star Restaurant. Previous to going overseas he had been running the Club Cafe for a number of years. Owing to being turned down by the Army in England as a cook for the front line, he served for a long time in the Army Cookhouse around Bransford and filled the boys so full of beans that when they got over to France Fritz didn't have the ghost of a show.

We wish Mr. Williams every success in his new venture, of which details will be found in our advertising columns.

Wedding

Matman-Akkermanns

The wedding took place yesterday, July 4th, at the residence of Mr. and Mrs. Martinus Cornelius Akkermann, daughter of Mr. and Mrs. C. J. Akkermann, in Mr. B. P. C. Van Megen, both of Strathmore.

Both bride and bridegroom arrived this spring from Holland, the bride coming with her parents, who are now farming the farm recently purchased from Roy Gether. The bridegroom is a Hollander of considerable means, who has lately made considerable investments in the district, and has purchased for his home the handsome residence of Mr. J. H. Brand on Third Street. They will be at home there after August 1st. The good wishes of the community will follow the young couple in their career of matrimonial bliss.

Mr. C. S. Laft is now here on duty at the Union Bank.

Good news from Creston, Mo. and Mrs. Ed. Smith are the proud parents of a ten pound boy, born on June the 15th.

Earmers to be Paid 50 per cent Excess This Month

OTTAWA, June 28.—Farmers will receive fifty per cent of the excess due them on Canadian wheat board certificates against July 15 next. Definite announcement has been made that the excess on the original wheat price will be at least forty cents per bushel. Interviewed by the Canadian Press regarding the exact effect of the announcement, Sir George stated that the exact price of last season's wheat crop would not be decided yet. Some million bushels remained to be disposed of by the board, but meantime the board would be able to make a 50 per cent payment to wheat growers and this would be not less than twenty cents per bushel. The balance would be payable when the marketing of last season's crop was completed and not later than the end of the present year.

No Transaction Took Place

In the house this afternoon in speaking to the bill extending the wheat board, Sir George Foster said that J. A. Robb had understood a statement made by Dr. McGill of the Winnipeg Grain Exchange and the latter had given word that the government had sold from fifty to seventy million bushels of wheat at a loss, but had quietly received to a subcommittee from Sir Robert Duden to Hon. Arthur Sifton, then in Europe in self that quantity of wheat. It was said to Mr. Robb to prove that any such transaction had taken place.

Dipping Recommences

The first dip of all the cattle in the district finished on Saturday morning, but last week, having been in progress since June 28, during that time more than 600 cattle went through the cage, and had a complete immersion in the chemical preparation designed to eliminate the mange parasite.

There have been some complaints as to the cattle, having been roughly handled while going through the cage, and several accidents have happened, but with a large number of cattle such have been treated here, it is probably impossible to avoid occasional accidents. It is always better for the owner of the cattle to be on hand when the dipping takes place.

Mr. Archd. McLean is foreman of the crew which is operating the dip. Another week's work should see the completion of dipping in this season.

Ardenode Locals

Mr. Harcourt and his family returned from a pleasant trip to Vancouver last Saturday.

Mr. and Mrs. Taylor, the Messrs. Gladys and Annie Jones, Misses Dorothy and Roma Evans and Mrs. Leach, were in town yesterday.

The Women's Institute meetings are being held every Wednesday at the various centres. Next Wednesday the tea will be held at the home of Mrs. Fraser.

The Women's Institute is making arrangements for a bazaar to be held in the Service school house on Monday. Mr. James Garfield has been very busy here recently. He recently hopes to finish a few of his other neighbors in the near future.

The editor of the "Bassano Mail" reports that the Bassano team defeated Strathmore last Sunday 1-2. He must have had a nice dream, as Strathmore has not met Bassano yet. The Demonstration Team carried on to the grand stand at 1919 on Saturday at Calgary Fair. Details will be given in next issue.

Opening New Bridge

Strathmore U.F.A. Co-operating

Great interest is being taken in the official opening of the new bridge near Carleton, over the Bow River. After the official opening sports will be engaged in, a baseball game between Strathmore and Carleton being one of the main attractions. Over \$300 is offered in prizes for the sports.

Strathmore U.F.A., at their meeting on Sunday, decided to co-operate in the celebration, and to do everything they could to make it a success. They want all farmers who can to meet in Strathmore at noon, and go down to Carleton in a body.

As Wednesday is the weekly half-holiday, there should also be a large attendance from Strathmore.

The opening of the bridge will be an important event in the history of the district, as it will open up communication with the rich farming district to the south of the river, which up till now has been dependent on precarious ferry accommodation.

S.S. Convention

(Continued)

The third Annual Union Sunday School Convention was held at Bassano on June the 26th and 27th. President of the convention, E. K. Zerkle, of Strathmore; Sec. Rev. Maclean, the Presbyterian Minister of the Union Church at Gleichen.

The convention was well attended, at four sessions. The Presbyterian Church, at Bassano was the building in which the convention was held and was filled, and at the morning session was crowded. Nineteen attended from Strathmore Sunday School.

Mr. Harold Scherer, Miss Scherer, Mrs. Garfield and Miss Garfield of Strathmore Sunday School attended. Mr. Harold Scherer was elected on the Nominating Committee.

Bassano friends entertained all delegates, including all Sunday Schools between Medicine Hat and Calgary.

The convention was a success from beginning to the finish. Next year it will be held in Strathmore. Mr. McLean of Gleichen, President; Rev. Paton of the rectorial Union Church, of Bassano, secretary.

Orange Service

Those attending the Annual Church Service of Strathmore Local Orange Lodge on Sunday evening were privileged to hear a very fervent and inspiring address by Bro. S. Bacon Hilllocks. He did not end with Christian patriotism, but his address was an appeal for right living and upholding the principles of Protestantism, in the individual, the Church, and the nation, and to stand by the unity of the Anglo-Bacon race, which he believed had a special mission for the regeneration of the world.

There was a large attendance of members of the Order, numbering close to forty, and the church was well filled otherwise by members of the general public. In addition to the local brethren there were present, Wm. Master, W. E. Baker, of Gleichen, Country Master of Calgary County, Dr. Strain, of Calgary, another prominent Orangeman, and a number of visiting brethren from Gleichen.

During the evening a quartet consisting of Mr. and Mrs. Vance Todd, Miss Cope, and Mr. Cope, rendered a selection which was appreciated.

At the short meeting of the Lodge, following on the service, the thanks of the Lodge were expressed to Rev. Phillips and the Church Board, and also to Bro. Hilllocks and the visiting brethren.

Strathmore Orange Lodge has been making considerable progress lately in membership and attendance, and one of the strongest local fraternal organizations.

Bountiful Rains Assure Crop Growth

Not since 1915 have conditions appeared as favorable for a big crop as they have this year, and barring early frosts or hail it will be a bumper.

Spring opening up late this year, but growth has been steady and conditions and crops throughout the district have never suffered for lack of moisture or heat. Last showers during June amounted to a total of two and a half inches of rainfall, having contributed to this happy result. From a line about twelve miles north the rainfall during the same period was considerably less, but the crop in this district too will come through good, whether arid suits of the heavy rain or about three six hours duration, which fell between Sunday evening and Tuesday evening. The precipitation during that period, as measured on the Government instruments at C.P.R. irrigation headquarters, amounted to 1.56 inches.

Every variety of crop, whether arid root, or vegetable, is in great shape. The only element that has contributed to do damage is the grasshoppers, and these outbreaks are sporadic, and are being successfully fought in the district principally affected near Carleton. There have also been reports of grasshoppers near Nanika, but not to any great extent. It is expected that the present rain will check them, but kill them out entirely, but vigilance should not be relaxed, for they are slow to depart their eggs a favorable winter may result in presence in more destructive numbers next summer.

The present rainfall is reported to be general all over the province as a whole, and with promised good prices for grain, due to short world market, the prospects for The Canadian West are bright indeed.

WILL DISCUSS HAIL INSURANCE

Strathmore U.F.A. will discuss changes in the Hail Insurance Act at a meeting to be held on Saturday, July 17. All farmers are urged to attend this meeting.

Have you seen the poster? Bring the children to the Orange Tree. A fairy will turn oranges into magic fruit. Each securing a prize, Tea, Games, etc. Ladies Anglian Guild, July 12th.

The road to Calgary is being considered improved on the crossings to the Government road camps. The roughest part is that within the Calgary city limits, and we hope that after this week's rain the Municipal authorities will get busy and fix it up.

The method adopted in Strathmore of putting and on the crossings to slow down the traffic is having that result, but what the children may gain in bodily safety may be lost morally in the bad language they hear. N.P. This is intended as a joke.

Last week T. M. Weiss made a trip in his bad language they hear. N.P. Florence Hollander.

NORMAN ALLAN IMRIE, lecturing on British-American relations at the Cheateau.

Heavy Death List As Result of Lincolnshire Floods

London, Lincolnshire, Eng.—Fifty deaths have resulted here so far from the sudden overflow of a small river running through the town, which is situated on a shoalbank in the waters nearly on Saturday night. The water rose so rapidly that houses in the low-lying part of the town were immediately engulfed in a rout which carried away bridges, fences, trees and other obstacles.

One terrace containing fifteen houses was entirely swept away.

Most of the people were in their houses taking shelter from the storm, when there came a rush of water three feet deep through the town. It may cause the weight of water prevented the escape of doors or other means many persons could have reached a place of safety. Within a short time the entire houses were engulfed by the torrent, which was two and a half yards wide. The water swept its way past the houses, demolishing outcrops, roadways, bridges, furniture, ornamental trees and the bodies of drowned animals. Bodies floated before the rushing flood. So sudden was the approach of the waters that a majority of the deaths occurred in the first moments of the flood, when the lower portions of the houses were awashed. Hundreds of persons are homeless.

Canada Sells War Supplies

Surrender Stores Disposed of by the Various Governmental Departments

According to a report laid on the table of the House of Commons recently a total of \$6,047,000 in surplus stores was disposed of by the various government departments through the war purchasing commission between December 1, 1918 and March 31, 1920. The departments of militia and defence sold a total of \$5,852,127 in stores, which included blankets, woolen and cotton piece goods, and footwear. The sale of goods commenced in December, 1918 and practically all goods were offered for sale by tender. In many cases the goods were too good for acceptance and price bids had to be prepared and advertised. Sales had been made in this latter manner since the first of January.

Do Not Need Passports

Ottawa.—U. S. Tourists visiting Canada do not require passports as a condition of entry into Canada from the United States or as a condition as to leaving Canada, was the announcement made from the department of the interior.

Canada welcomes bona fide tourists, the statement says, and extends a cordial invitation to such persons to enter in entering and leaving the Dominion.

Italians on Way West

Port Arthur, Ont.—The first party of several hundred Italians who are coming to settle on farming lands in western Canada, reached Port Arthur on a special train, and continued on through to Winnipeg. The party was twenty days crossing the ocean and there were about 100 men on the train and more are coming by other steamers.

Moving Way For Franco-German Trade Relations

Berlin.—The German delegates who have returned to Berlin from the industrial conference in London, fully satisfied with the progress thus far, says the Vossische Zeitung.

As regards chemicals, says the newspaper, a reasonable and proved easy, pre-war connections being resumed. In the textile and metal groups, however, agreement was difficult because of the failure to bring together in union persons suitable for an amicable understanding. For example, there was no representative present from Germany in the textile heavy industries. The newspaper says that no decision was arrived at on the necessity for co-operation between certain branches of the French and German chemical trades.

Coming Back to Canada

Driven Home to Privilege by Conditions in Australia

Labor troubles and long droughts in Australia are bringing a number of former Canadians back to the prairies in this country, says a dispatch from Vancouver. Several families arrived in the city this week on the steamer Niagara and at once made arrangements to proceed to Alberta and purchase land. Several in this group gave a very glowing picture of conditions in the West, attributing their unsuccessful work in that country to labor conditions and drought.

John Davidson, who arrived on the Niagara with his wife and sons left for Alberta immediately, making the initial voyage of the steamer of eight and ten years. Four years ago he left Manitoba for New South Wales where he has been successful in raising money through drought. Another Niagara arrived, Joseph Parsons, of Torontoville, Australia, is also returning to the prairies after several years of discouraging efforts at farming in Australia.

J. F. Williams and J. C. M. Coomb, who arrived on the Niagara, are also returning to the prairies, as they say, which will shortly have for Alberta to locate there. They are selling out their Australian interests, which will have a tidy sum to invest in Canada.

Railway Corps for Militia

Valuable Service to Allies During the War Will Be Recognized

By Canada

The Canadian railway troops, whose battalions rendered such valuable service to the whole of the British empire in France during the war, are to be perpetuated by the organization on a unit basis of a new unit of the non-commissioned force to be known as the Canadian railway troops. Authority has been given by the department of militia for the organization of this corps, but the legislation and establishment will be the subject of an order to be issued at an early date.

The work of the Canadian railway troops in France was not confined to the Canadian corps, but units of railway troops were divided among the various divisions of the imperial force until the red railway square which the corps was distinguished was familiar all along the British front. Although the operation of the railways was generally in the hands of the railway operating division of the Royal Engineers, it was the Canadian railway troops who made themselves famous by the combination of speed and efficiency in railway construction, and equipment and record. It has been established that the new Canadian railway corps is being organized.

Prince William Arrives in U. S.

New York.—Prince William of Sweden, second son of King Gustave, arrived here from central America on the United Fruit company's steamer Santa Maria. The prince has been engaged in scientific exploration in central America since early in the year.

Moving Way For Franco-German Trade Relations

Berlin.—The German delegates who have returned to Berlin from the industrial conference in London, fully satisfied with the progress thus far, says the Vossische Zeitung.

As regards chemicals, says the newspaper, a reasonable and proved easy, pre-war connections being resumed. In the textile and metal groups, however, agreement was difficult because of the failure to bring together in union persons suitable for an amicable understanding. For example, there was no representative present from Germany in the textile heavy industries. The newspaper says that no decision was arrived at on the necessity for co-operation between certain branches of the French and German chemical trades.

Attack on Red Amery

Truth Declares He Is Not A Trust-woy Representative

London.—Truth, which is independent in general politics, but consistently supports free trade, says:

"An episode of the West Indian conference at Ottawa, Col. Amery and Lord Milner are quietly pursuing the project of industrial preference which should be obtained by free traders. The West Indians are even convinced that the Dominion might easily be disintegrated by their various administrations are attending the conference, it is doubtful as to how far they will present the interests and the opinions of the local trading community and the population in general. Arrangements which might be advantageous to Canada might easily be disadvantageous to the West Indians and the Mother country as well. Col. Amery is certainly not a trustworthy representative in this matter. He takes the view that anything which benefits the Dominions benefits himself, which is a very reasonable view, but, in more sentimental moments, is more sentimental nonsense."

Better Farming Conference

Farmers in Dry Area Will Meet To Discuss Problems

A "Better Farming" conference is being called by Hon. C. M. Hamilton, minister of agriculture for Saskatchewan, at Self's Centre on July 6, 7 and 8, to study existing conditions, the situation and discuss and consider what changes in farming methods are necessary to lessen the serious effects of the drought years and provide a more prosperous and permanent system of farming. The minister states that the delegates to the conference should be able to give some more or less demonstrated, during the trying experience of recent years, their ability to grow crops successfully, as the meeting will necessarily be in the nature of a conference where ideas will be exchanged, and those who are seen to represent the various districts should be able out of their own experience to convey valuable information to the conference. Special attention will be given to a discussion of the crops and production methods which the delegates found satisfactory and successful.

"It is expected that the growing of corn, sunflowers, fall rye and sweet clover will be given special consideration," said Mr. Hamilton, "as there is an impression on the part of those who have given the matter careful study, that the growing of grain alone will not make for profitable or permanent success in the area under consideration. This system is confirmed by the experience of the past five years, during which time the prices for grain products have been unusually low, thus rendering it impossible for the farmer to realize a profit. This conference promises to be an important event in the development of more stable conditions in the southwest. The area has many problems to solve, but the courage and perseverance of the settlers living there, who are likely to take an energetic interest in whatever plan the conference decides after careful study is best to follow."

Awards for Naval Inventors

Gratuities For Special Services Have Announced to Large Sum

The Navy Appropriation account for 1918-19 recently issued, gives a list of gratuities paid for special services, amounting to £14,091. The sum of £10,000 was paid for an invention of hydroplanes, £7,000 for a patent for a machine for testing the strength of connection with naval motor boats; £2,500 for an invention of floating mine torpedoes; and £250 for an invention for improving the hull and depth receivers. The gratuities for sinking and destroying enemy submarines amounted to £2,181.1s. and there for sinking submarines £29,182.1s. The awards to crews of the merchant marine for services and valor in special gratuities were £2,500.1s. 11d.

Gold Deposits in Full Blast

Dawson, Y. T.—The Yukon's first gold dredge is now operating in full blast. The hydro-electric power plant of the Yukon Gold company has started and its dredges immediately began dredging. Other dredges have also commenced operation. The territory's yield this season will run into millions. The clean up of the winter months is now on.

Wheat From Russia

According to a news agency report in Rome the first exchange of wheat between Italy and Russia will occur shortly by way of the Black Sea, says an exchange telegraph dispatch from Rome. The report says, will consist of 300,000 tons of wheat of a first-class amount of wheat.

C. P. R. Lines Spread With Mopnet

Winnipeg.—D. C. Colman, vice-president of western lines of the C. P. R. has wired instructions from the coast to have all the rights of way of the C.P.R. in the grass-hopper infested areas spread with poison bait. The ingredients of the bait will be supplied to the company at cost by the previous government of Manitoba and Saskatchewan.

Viscount French Insulted

Irish Rebels Remove Lord Lieutenant's Name From Free Men's List

London.—The corporation has decided to remove from the roll of her city's freemen the name of Viscount French, lord lieutenant of Ireland. The Unionists challenged the legality of the proposal. The mayor of the city voted for it. He said later that if he had not done so, his refusal would have been made out of his refusal.

Beasts Know the War Was Over

Most of Them Have Returned To Their Former Haunts

Frightened by the noise of battle, the wild beasts of East, Central and West Africa have returned to their former haunts, says a dispatch from the north and south, travelling countless hundreds of miles in their flight and now they are in their former haunts. How did the wild beasts know that the war was over? The rhinoceros, giraffe, zebra, buffalo, rhinoceros, lion, leopard and porcupine are certainly all perfectly aware of the fact. Having known their various avenues of escape, they have returned to their former haunts, the north and the south. Wherever the method of communication, the wild animals certainly got the news quickly. There was no sooner accomplished that the African natives began to see the homeward migration of whole companies of wild beasts through their territories, which were formerly in these particular communities and obviously passing through. Four years previous they had come back to their former haunts and were bound in an opposite direction. They were in great haste then and possessed of fear and apprehension and carried off together, the age-old war of the jungle forgotten in a common flight. It may be forgotten, accustomed to the sound of firing, but wild animals know it. Fear of strange noises is instinctive with them. Animals born in the jungle are instinctively suspicious. And it is a well-known fact in zoological parks that lions can be controlled instantly by the sound of a military march, as far as is known they have never seen a military march.

Treasure Trove

Ten Casks of Rum Are Said to Have Been Buried at Cumberland House 150 Years Ago

Search is being made at Cumberland house for ten casks of rum, which, according to Indian legends, have been buried there for the past century and a half. The story which has been handed down is that the rum was brought into the north by a French trader who stopped at Cumberland House, and was turned back by the Hudson's Bay people after he had hidden the liquor which had been intended for Indian trade. The legend cask is supposed to include also merchandise, muskets and ammunition, but it is thought that these goods may not have been to the same advantage as the rum, which is the object of the search.

Forest Fires In New Brunswick Cause Great Loss

St. John, N.B.—The little village of St. Quentin, Reservoir county, N.B., on the line of the C.N.R., has been almost wiped out as the result of forest fires which have been raging on the crownlands in Reservoir county.

St. Quentin was a thriving village of about 2,000 people and was a centre of the lumber and pulp industries. The fire, which resulted in a monetary loss variously estimated from \$250,000 to \$500,000, first started in the millyard of J. E. Michaud, catching from burning embers carried by the winds from the forest blazes. When the fire had spread to 60 dwellings, three mills and two hotels, Canadian National Railway station, provincial bank and many business places were wiped out. About one hundred persons were killed. The fire, which resulted in a monetary loss variously estimated from \$250,000 to \$500,000, first started in the millyard of J. E. Runabout Supplies Town with Water

First Wheel of Ford Pumped Water
for Ashbury Park, N. J.

When jumping brook jumped the dam recently, Ashbury Park, New Jersey and its 15,000 inhabitants face an unpleasant drought. The Monmouth County Water Company, which supplies Ashbury Park and the surrounding country, was up against it. Just as the water was leaving the bottom of the reservoir, Chas. H. White, Superintendent of the Monmouth County water, solved the problem with a Ford Runabout.

In a letter to Mr. Henry Ford, Mr. White said of the breaking of the dam and subsequent water shortage:

"This let down the water which is supplied from the storage plant to our consulting tank, thence to our reservoir and cut off all supply of water and we could not get any more from our reservoir was dry to supply the city. The dam broke at 11:00 o'clock at night and we were completely out of water by the next morning."

"The writer was at a loss what to do for a piping to pump water from our brook into our consulting tank. I scoured the surrounding country for pumping outfit, the best I could do was get delivery in two weeks."

"I had a centrifugal pump in my storehouse that was dismantled even or eight years ago. I immediately had this brought to the brookside and rigged up. In the meantime I attached a pulley to the rear wheel of one of your remarkable Ford roadsters, hooked it over wheels, attached a belt to one of them and pumped water from the brook to our consulting tank, thus saving the day."

"This outfit pumped 75,000 gallons of water in twenty-four hours."

Pacific Coast Tours

Special Summer Tourist tickets to Vancouver, Victoria, Seattle and other Pacific Coast points are now on sale daily by the Canadian Pacific Railway.

These tickets will bear a third return limit and tender first and second class travel en route, which gives travelers an opportunity of visiting some of the beautiful resorts in the Rockies, such as Banff, Lake Louise and Glacier House. The company maintains splendid resort hotels. Side trips and diverse routes may be arranged in connection with these tickets on application to the agent.

In addition to the "Trans-Canada Limited" exclusive sleeping car train, a choice of two other daily trains is offered, and as all are equipped with open-top observation cars and oil burning engines through the mountains an

excellent view of the Rockies may be had with no danger of cinders.

Any Agent of the Canadian Pacific will be pleased to give further particulars and make the necessary arrangements for the trip.

Crowfoot Notes

Mr. and Mrs. Ed. Scher and daughter visited Sunday with Mr. and Mrs. A. Barnett.

Miss Julia Barnett of Edwardsville, Ill., is at present paying an extended visit to her brother, Mr. A. Barnett.

Mr. and Mrs. Eric Englund and family took dinner with Mr. and Mrs. Day of England.

The painters are at present painting Mr. D. E. Garretts house and barn. Mr. Norman Scher was a Sunday visitor at Tudor.

Miss Nellie West, of Chicago, Ill., is visiting with her parents, Mr. and Mrs. B. West.

Mrs. S. F. Garnett, Miss Lucy Garnett, Miss Ruth Scher and Harold Scher returned to Edmonton and attended the Sunday School Convention.

Nearly everyone from this district spent one day at the Calgary fair.

Book-room boys are at present working on the H. G. Scher and Eric Englund's houses. Geo. Small has completed an addition to the W. F. Brown's house.

The rain which fell on Monday was very welcome.

A blizzard from here attended the Children's Day programme at Tudor.

There was a splendid turnout at Wednesday's Sport Club. A fine time was spent at tennis and baseball.

Crops here have never looked more promising than at present.

Saturday evening at 7 o'clock the Crowfoot baseball club will cross bats with Namsko on the diamond one-half mile north of Bold. Warm home. Everyone turn out and root for the home team.

This Week's Results

In Photograph Competition
There is not much change in the Photograph Competition figures. This week, though Miss Martin has added a respectable score to her figure. Within the next two weeks the candidates will without doubt be very active, for there are special cash prizes offered, and also a bedroom clock.

Following are the figures on Monday's count:

Edith Martin	25077
Doris Gardner	19478
Grace Anderson	19067
Ruth Ann, Namsko	14214
Jean Fletcher	29995
Freda Schaufels	26221
Doris Dehom	22979
Alice Way	20756
Sarah Miller	11226
Isabel Newall, Nightingale	8110
Helen Miller, Crowfoot	7510

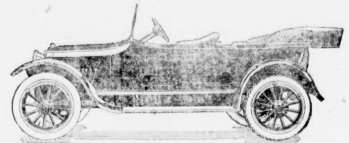

The Product of Experience

Made in Canada

YOU'LL be surprised how little it costs to operate this Chevrolet "Four-Ninety" Touring Car.

Twenty-five miles on a gallon of gasoline is not an unusual record. Tires last an unusually long time. Repairs are few and far between. Care-free regular performance is the Chevrolet rule.

Yet with all its economy and low price, Chevrolet "Four-Ninety" Touring Car is a handsome, roomy, comfortable car—a car you can be proud to own.

Chevrolet "Four Ninety" Touring Car.

Farmers Should Assist In Work of Collecting Agricultural Statistics

The statistical reforms accomplished or inaugurated by the Dominion Bureau of Statistics, established in 1918, none of more importance than that which is concerned with agriculture, the leading industry of Canada. It is essential that the mercantile, banking and insurance interests should have accurate information respecting the country's annual agricultural production, and that statisticians and legislators should know the volume and direction of the country's progress. To farmers themselves it is of supreme importance to know what areas are being devoted to particular crops in their own and other countries, how such crops are being extended or withdrawn from cultivation, and what is the volume of production in one season as compared with another. By means of accurate information on these points, they are able to form their own judgment as to the local crops likely to prove most remunerative. Similarly, a knowledge of the numbers of farm live stock, and whether these are increasing or decreasing from year to year, is important to dealers; and is at least of equal importance to breeders and producers. Moreover Canada's contribution to the International Institute of Agriculture at Rome, has undertaken to furnish periodical reports on the agricultural production of the Dominion, requiring and publishing in exchange the valuable information respecting the agricultural production of other countries which the Institute collects and disseminates.

In Canada, estimates of agricultural statistics by the Dominion Bureau of Statistics have been annually made since 1908, these estimates having been compiled from the returns of crop correspondents in percentages of the previous year's data. Except for immediate and tentative purposes, this method has now become antiquated and imperfect; and during the past three years the annual agricultural statistics of the Dominion have been based on returns of areas owned and numbers of live stock on the farm, collected from individual farmers in the month of June. This information is obtained by means of a simple card-and-schedule, which is distributed to farmers through the agency of the rural school teachers and the extension agents, when completed, are first sent to the provincial government, who, after having them sorted into counties or districts, transmits them to the Dominion Bureau of Statistics at Ottawa for final compilation into totals by adding machines.

The figures thus collected form a fairly safe basis for estimating the totals according to the ratio which subsists between the returns of the farms and the returns actually received. After harvest and threshing, estimates are obtained from crop correspondents of the average yield per acre, which, multiplied by the area, give the total yield. The total yields, when multiplied by the average values per unit, give the total values. The final results are adjusted after consultation between the Dominion and provincial authorities, and identical figures are then released for simultaneous publication by the Dominion government, the latter publishing the figures for each province, and for the whole of Canada, and the latter publishing the figures in and for their respective provinces, and in most cases by local counties or crop districts as well. There is in one or more of these various methods of distribution, instances in Ontario, a

process is reversed, and the cards are sent and collected by the Dominion Government for compilation by the provincial government, the final estimates being calculated from the total acreage according to plans long in use. In British Columbia the cards are addressed and mailed by the Dominion Bureau of Statistics direct to the farmers, and the compilation is effected locally. But the essential feature is that division of labor is mutually agreed upon, and the results obtained are identical. So that the collection of figures which used to characterize the government agricultural statistics of Canada is now happily a thing of the past. Similar procedure is applied to the numbers of farm live stock as classified by ages, and information of the past. Similar procedure is applied to the numbers of living animals on the farm in June is collected on the same cards as used for crops. The system was applied experimentally for the first time in June, 1917, in four provinces, in 1918 and 1919 it was extended to all the five provinces of Canada. The proportion of returns has varied from about 21 to 59 percent of the total number of farms, except in two of the provinces, where last year, where the proportion fell below the minimum in consequence of the dislocation of arrangements by the Winnipeg strike.

As the time is now approaching for the collection of this year's returns of the areas owned and the numbers of live stock, it is desirable to call the serious attention of farmers to the duty of filling up the simple schedules of areas owned, and the numbers of live stock, who does not receive a card by the middle of June should apply for one either to the school teacher in his school district, or to the Agricultural Department of his province, or to the Dominion Bureau of Statistics, Ottawa.

Increasing Interest In Aviation

Government Has Authorized Insurance of Operations In Western Provinces

The month of May has witnessed more real progress in the science and business of flying in Canada, insular as governmental action is concerned, than has been accomplished in any period of several times a month's duration. Indeed, it may be said that the month just ended possessed all the earmarks of the dawn of a new era for Canadian aeronautics.

Probably the most important of news is with regard to the arrival of the British gift machines at Camp Borden, no less than 99 machines, described as follows: 12 D.H. 9's, 12 D.H. 4's, 11 S.E. 5's, 8 Avro, 2 Hio flying boats, 3 F3 boats, 1 Sopwith, and a number of wireless equipment and several tons of spares. Lt.-Col. A. K. Tyler, O.B.E., of Toronto, who has been appointed air officer commanding the Canadian Air Force, will be assisted by a staff of three officers, who like himself, will be appointed temporarily.

The camp will be opened as soon as provisional committees have completed their arrangements, by which all officers, whether they be of the convenience. The camp, which is the best equipped in the British Empire, possesses also nine heavier-than-air machines, dirigibles, hangars, etc., besides comfortable permanent quarters, swimming pool, and is going to be the best air force in this world.

As a result of recent investigations by Air Marshal, the Canadian Air Force, has been granted by the government to inaugurate flying operations in the vicinity of Morley, Alberta, in southern British Columbia. At Morley, D.H. 9's, fitted with Liberty engines and equipped with wireless, will be used for demonstration and experimentation for forest fire patrol and a certain amount of photographic work will also be done in Rock Mountain park near Banff and Laggan. The authorization for this work has come so late that the result will necessarily be somewhat restricted this year, but it is hoped that very considerable information will be obtained.

The opening in British Columbia, promise to be on a somewhat larger scale. It is proposed to establish a seaplane base at Vancouver, and Maj. C. MacLennan, D.S.O., has been appointed air station superintendent and left Ottawa on May 18 to assume his duties.

It is expected that in the near future a considerable number of appointments will be made in connection with the interest of the rural community that statistics relating to their industry should be accurate and trustworthy, and that on an independent and unbiased authority. No individual returns are published, and the information collected is not used in any way to the detriment of the farmer. It is confidently expected that as farmers become better acquainted with the system organized for their benefit, and the practical value to themselves of accurate agricultural statistics there will be a continuous increase in the number of returns. Meanwhile, it should be remembered that whatever degree of error may attach to the figures issued is attributable to the estimate that has to be made from the actual returns. In fact any imperfection of the system is increased and the necessity for compilation is in consequence reduced, with the risk of error being eliminated and the greater accuracy of the totals be established.

Alberta, Westsaskatchewan, British Columbia, Victoria, Vancouver, Cranbrook, Manitoba, Virden, Winnipeg; Nova Scotia, Trenton, Ontario, Guelph, Hamilton, Ottawa, Perth, Saskatchewan, Lloydminster, Melville, Regina, Saskatoon.

Up to May 15, three aeroplanes had been licensed.

Testing Eggs
When the freshness of an egg is doubted, break the egg separately in a cup before mixing them together. To ascertain the freshness of eggs without breaking them, place the egg in a solution made of two ounces of salt to one pint of water. A fresh egg sinks, an egg a few days old has a tendency to sink in the liquid, while a stale egg floats on top.

Questionable Exactitude
Mrs. Sears was a charming old lady who had metrical habits, a passion for saving things. A result of the combination of these characteristics gave her niece a slight shock when she went to the orderly medicine cabinet and found a little neatly labeled, "Calomel—I think."

The first steamer was seen on the Thames in 1815; the first steam voyage to India was accomplished in 1825; the first English railway was opened the same year.

Richard Coeur de Lion was killed by an arrow at the siege of the Castle of Chalus, Limousin, France.

Plan Irrigation Project For Saskatchewan

Cost of Proposed Scheme Will Be One Million Dollars

Further evidence of how the prairie farmer now regards irrigation in the west, and another instance of the general demand for extended schemes comes from the southwestern corner of the province of Saskatchewan, where a petition has been prepared for the launching of a new irrigation project under the provisions of the newly passed irrigation act. The scheme is to cost approximately one million dollars, and will be easily the largest project of its kind attempted in Saskatchewan, embracing 12,000 acres. Furthermore, it is stated that it will prove one of the cheapest irrigation schemes on the American continent, the estimated cost being less than one dollar per acre. The project will be easily the largest project of its kind attempted in Saskatchewan, embracing 12,000 acres. Furthermore, it is stated that it will prove one of the cheapest irrigation schemes on the American continent, the estimated cost being less than one dollar per acre.

The schemes involves the diversion of the Battle and Bowdler creeks into Davis lake, and the construction of a dam four miles west of the lake across the White Mud Valley in the north of the Battle Creek. The project will be easily the largest project of its kind attempted in Saskatchewan, embracing 12,000 acres. Furthermore, it is stated that it will prove one of the cheapest irrigation schemes on the American continent, the estimated cost being less than one dollar per acre.

Three channels are to be cut from the dam and the water will be carried by main irrigation canals through the country down to the Lethbridge-Weyburn line of the C.P.R., and proceeding thence by smaller canals to the country north of Consul, Virden, and Robart. While this is the extent of the scheme, it is stated that it is intended that it would be possible to extend it farther to provide for irrigation of considerable tracts of country farther south.

Enterprising Iceland

Is Modern Land, But Has No Railways or Street Cars

Mrs. Jonasson, of Reykjavik, Iceland, has been shopping on a large scale in New York for her chain of four stores in Hafnarfjord, Isafjord, and the Icelandic capital, and naturally enough, a report has been circulating here. The Evening Post of New York prints the interview, and the reader gets an interesting picture of modern Iceland, where there are no railways and no street cars, but there are lots of automobiles, and where the women have the same rights as men. The picture is a very interesting one, and the reader gets a very good idea of the country and its people.

It is expected that in the near future a considerable number of appointments will be made in connection with the interest of the rural community that statistics relating to their industry should be accurate and trustworthy, and that on an independent and unbiased authority. No individual returns are published, and the information collected is not used in any way to the detriment of the farmer. Many Valuable Uses Found For Western Flax Straw

In the bureau of standards at Washington, there will soon begin a series of experiments on flax straw from Western Canada which might be of inestimable importance in the future development of flax growing in the west. Chief among the objects held in view by the experimenters is that of demonstrating, if possible, the feasibility of making paper from flax straw. Some kinds of paper have already been made, but it is hoped that, by means of the processes now in hand, the desirability of preventing too great an incursion on the forest resources of Canada, some method may be found of using this material for the manufacture of a pulp from which newspaper can be made.

A shipment of flax straw is now leaving the west for Washington. In the west nearly two million acres have been devoted to the growing of flax for seed, the climate being largely regarded as not exactly right for the flax fibre. Hundreds of thousands of acres—some say as much as two million tons of the straw fibre have been burned every year, a loss which in places like Ireland seems almost incredible.

Dr. A. B. MacCallum, of the research council, would express no opinion as to the prospects of success, saying that he wished to state to those which might well be disappointed. However, shipments would not have been made if there was not some prospect of utilizing some good results which would follow.

A Canadian Hero

Major Collishaw Has Won Almost Every Possible Distinction

Major R. Collishaw, V.C., one of the most distinguished of Canadian fighting officers, has come to Canada to visit his parents at Victoria, B.C., and will afterwards proceed to India, where he will be attached to the air squadron on the Northwest Frontier. Major Collishaw has won almost every distinction possible for soldiers or airmen. During his service in the air force he has won the Victoria Cross, D.S.O., with bar, the Distinguished Flying Cross, and among other decorations awarded him are the Croix de Guerre, the Cross of the Order of St. Stanislas, and half a dozen other decorations.

C.N.R. Men on G.T.R. Board

The Canadian government has chosen its representatives to sit on the board of management of the Great Trunk Railway. Carlos A. Hayes, vice-president in charge of traffic in the C.N.R., and Samuel J. Hufferford, vice-president in charge of operating, maintenance and construction department, Canadian National Railways, both of whom have had over thirty years of actual railway experience and have risen step by step until at present they are recognized as the foremost railway men in Canada, each an expert in his own respective field of service.

Mrs. Carlos A. Hayes was born at St. John's, Nfld., March 10th, 1865, and entered railway service in April 1882, holding various clerical positions in the accounting and general freight departments of the Boston and Maine railroad at Springfield, Mass., until November, 1890.

From 1890 to 1892 he was with the Central New England and Western, and Philadelphia and Reading railroads. He joined the G. T. R. in 1892, and has since held various positions in the C.N.R., including vice-president in charge of operating, maintenance and construction department, Canadian National Railways, both of whom have had over thirty years of actual railway experience and have risen step by step until at present they are recognized as the foremost railway men in Canada, each an expert in his own respective field of service.

Industry has been developed already to a small extent, the lines manufactured from this western straw being mixed with 80 per cent of cotton.

The manufacture of paper, however, is the chief aim of the experimenters, as it is well known that the possibility of success in this direction now rests on the lap of the gods. If there is a success, the western mills for making pulp of this straw come to be built in Western Canada as a result of the demonstrations.

There is little doubt but that the flax-growing industry in the west would grow by leaps and bounds. In addition to amount received from flax seed, the western grower would reap a return for the straw as well.

Dr. A. B. MacCallum, of the research council, would express no opinion as to the prospects of success, saying that he wished to state to those which might well be disappointed. However, shipments would not have been made if there was not some prospect of utilizing some good results which would follow.

Where The Horse Comes In

The Horse Is The Most Efficient Power Unit In Existence

The stage coach gave way to the railway, and the sailing ship to the steamer. Thinking along the same lines, many people prophesy that the horse will give way to the motor, and become extinct. Most careful investigation of the facts goes to show that this is a fallacy. For fast road travel the car is certainly superior to the horse traction, but for farm work it would seem that the horse can at least hold his own. Next to man himself the horse is the most efficient power unit in existence. Wherever power is needed to move loads across fields or through country lanes, there inevitably come times when the power required to move the load becomes two or three times the normal. The wheels dip into a mud hole or get up against a rock. In such a case the motor is stalled, but the horse is not. The horse can, at a pinch and for a short period, exert

a pull three or four times greater than the usual. Also he can cross soft ground where a motor would be hopelessly bogged. Again, a horse lasts longer than a motor. The life of the average farm tractor is not more than three or four years. A horse, however, will work at three years and is good for nine or ten years of useful toil. And another point in his favor is that there is no heavy bill for repairs. Still another point which is worth the farmer's consideration is the horse's contribution to the fertility of the fields. A draft horse produces several tons of manure annually, a motor none at all.

Ontario Goes to Old Country
Seven carloads of Ontario eggs were shipped last week to Great Britain.

CHANGE IN SUBSCRIPTION PRICE

Owing to recent heavy increases in the cost of newsprint, also increased production costs generally, combined with increased postal rates, we are obliged to raise the subscription price of the Standard. The revised rates which take effect today, Wednesday, June 16, are as follows:

Local (within 25 mile radius of Strathmore) per year **\$2.00**
This includes subscribers who receive their mail at the following Post Offices.
Blind Creek, Glenview, Tatum, Carleton Place, Northgate, Balfour, Tupper, Langdon, Chatham, Kenora, Selkirk, St. James, and Rockford.
Outside above radius but within British Empire, per year **\$2.50**
U.S.A. and Foreign, per year **\$3.00**
Single Copy **10c**

Candidates in the Postmaster's Competition will be allowed up till Saturday of this week to have in duplicate (indicated up till today at the old rate, but not for more than one year in advance). We feel very sorry to have to announce this increase, but it is impossible to avoid same. The Standard comes to you with a weekly newspaper in the Province of Quebec, quality and quantity of news furnished, efficiency in production, and extent of circulation. The revised rate of subscription now adopted is to cover increased postal rates, increased rates by the Postmaster-General. The rates of postage per pound are both quadrupled within the British Empire, foreign subscriptions require an additional stamp, and have to be separately wrapped.

Farming on a Business Basis

Day by day the farmer is coming to a fuller realization of the fact that the farm as well as the factory must be run on business lines if farming is to be made really profitable. There is no better proof of the great profit possibilities in agriculture than the fact that farming has always been the means of making a good living and often a comfortable fortune despite the various ancient methods used in our grandfathers' and even in our fathers' times. The city manufacturers would be in the bankruptcy court in a very short time if they employed merely hand labor. If he did not use all the machinery applicable to his business he would find himself far behind his competitors. In fact he would not be able to do any business at all because he would be unable to sell his product at the price of the machine-using manufacturer. This principle of increasing production through labor saving has been recognized on the farm as well as in the city with the result that mechanical equipment of all kinds has replaced to a great extent the old, time-worn hand work methods of doing business.

And now the farmer is following the city man yet another step towards increasing efficiency. Mr. City Man has learned that labor saving is a good thing not merely in his business but in his daily life at home, that he will have more energy for his daily work if he can enjoy his leisure hours without having to do any tiring unproductive work. The farmer is following his example in this respect and today on farms where the pumping, churning, sweeping, washing, milking, and a hundred other tiring chores were done by hand in time outside of real working hours, we now find the farmer and his wife and family enjoying the leisure that their hard work entitles them to. Electricity, furnished by dependable little light and power plants, has become the household servant and extra horse-man on thousands of farms all over this country. Of course, light is the first thing one thinks of when electricity is mentioned and it is true that electric light is universally used wherever it can be obtained. It is also true that electric light makes a wonderful difference in the farm home, brightening and cheering every phase of home life. But many a farm family is finding that the work electricity does through the many electric power appliances now available for home use is even a greater service than the furnishing of light.

BASEBALL

Strathmore 14—Rockford 3
Sunday's game ended in a rather easy win for Strathmore as the visitors from the north-eastern town, Rockford only secured three rallies during the game, while the locals got fourteen, seven being in one inning. Rockford started out with one run in the first inning of Dick Jacobs, but this was the only one they got off him, Dick playing good ball during the fifth inning he was in the line. In the third inning Strathmore started scoring. Ralph Knight hitting out a home run and bunting in two men. It would not have been a home run but for the long grass which prevented the fielder finding the ball for a little but anyway it was a good three home run. However a suggestion to the grounds committee to have the grass cut before next game. The fourth inning was a quiet one, Strathmore pitcher having a weak spell and the batters also falling down on the job. Near the end of the fourth inning, however, Strathmore changed to Duffin, who though he had played the previous day at Brundage's pitched pretty well and four additional runs were secured. Strathmore changed batters in the sixth, Brown and Kinnison relieving Jacobs and Boyles. Kinnison had a three home run in the eighth.

Following is the score by innings:
Strathmore 9 3 2 0 2 1 1
Rockford 0 0 0 1 0 3 1

A Tractor That Will Not Last Will Not Pay

Long life and low upkeep expense are two outstanding features of the Rumely OilPull.

Many of the first OilPulls built over eleven years ago are still working as satisfactorily and economically as when new. "Old Number One," the first OilPull, has cost its owner but \$200 for repairs in eleven years.

The OilPull is built in four sizes—12-20, 16-30, 20-40 and 26-60 H. P.

LOCAL INTERESTS

OF LOCAL INTEREST
Readers are requested to send in items for this column not later than 12 o'clock Monday noon preceding day of publication. All local news items are welcomed by the Standard. Phone 17 or 18.

Under the auspices of The Catholic Men's Committee, a box social and dance will be held in the Opera House on Friday evening of this week. Good music is promised and a fine time assured.

Mr. and Mrs. F. T. McElhoes have gone on a trip to the coast.

Mr. T. H. Eves has taken over the agency for the Overland cars, and has sold a new Overland-Four to Mr. Beach of Messrs. Fox and Beach.

Miss Mary Taylor has new returned to her home in Strathmore, having recovered from an attack of appendicitis, for which she was operated on in Calgary.

Mr. Jack McDonald was in town during the weekend on a visit. Mr. Dan McDonald is expected shortly on a two months stay.

Dad Tibbette, Angus Watson, and Mr. and Mrs. Frank Butler returned during the weekend from their visit to the Shrine Convention at Portland, "Dad" reports having had a glorious time, and met an old acquaintance whom he had not seen for 64 years. There were over one hundred Shriners in attendance at the Convention, and there was something doing all the time.

Mrs. E. Dobson left last week for a two months visit to Desboro and Berly, Ontario.

The Ladies Aid of the Union Church are holding a party sale on July 10. Kindly keep this date in mind.

We are sorry to hear that Mr. W. H. Phinney, who has been a resident of Strathmore for a number of years past, is leaving on Friday of this week to take up an appointment in the grocery business at Vernon, B.C. Mr. Phinney has been connected with the store now conducted by Messrs. Beach and Fox for a number of years past, almost back to the time of George Lloyd, and he also takes a prominent part in connection with the Oddfellows, Tennis Club, and other local organizations. His wife, Mrs. Phinney, has been here almost since the town started coming here with her parents ten years ago.

Mr. Harry Tompkins, our general station agent, is at present on his annual holiday.

Among those who have bought Chevrolet cars lately from the local dealer, Mr. Harold Bell, are Messrs. Harry Ackerman, Van Baskirk and H. G. Scheer.

Mr. L. Williams, vice-principal of Strathmore School, is attending the summer school in connection with Edmonton University, taking up some special subjects.

Christy Bros. shows were here on Saturday, and attracted a good and large, despite being here on short notice.

One local man met the circus chieftain on the road late Saturday night while it was being taken back to its car, and decided to give up the prescription and mail order habit.

Mr. Chas. Palmer, formerly of Strathmore and now of Drumheller, was here on the last of the fall of last week, reverting old acquaintances. Charlie is looking very well and fit. He was delighted to find that the corner of the Strathmore and the road is still known as Palmer's Corner, and that the green house is still a local landmark.

Mrs. W. R. Harvey has now returned from Saskatchewan. She had the misfortune to be taken ill with appendicitis while down there and was started coming here with her parents now recovered.

Frost predicted a dry month for July, but so far apparently away on as far as this section of the country is concerned.

Dr. J. M. Brand, Veterinarian, is visiting in one of the new Porsches recently purchased from the local dealer, Mr. W. C. Brown.

A large number of local people took in the Calgary Exhibition, especially on Thursday.

Deputy Provincial Treasurer,
Parliament Buildings, Edmonton, Alta.

CHAUTAUQUA NEXT MONTH

Chautauqua comes to Strathmore on 10th. We have not the full programme of events before us, but are assured that it is superior to anything that has ever been here before. Local people should assist the speakers or the Chautauqua by loaning it for the next four weeks and buying their tickets early. A number of public spirited men of the town and district are standing behind the Chautauqua, and a little loaning from everybody will put it over the top with no trouble at all.

It might also be mentioned here that Strathmore has been booked up for the winter lecture series under the same auspices as the Chautauqua. Remember the date.

Chancellor

The Misses Towgood and Malcolm have returned from High School in Calgary for the summer vacation.

Two pinches have been organized during the past week; the first by Miss Campbell, teacher-school children which was held on the Chancellor grounds on Friday, June 25, the second on Sunday 27th at Mr. T. P. Hutchings on the Parkfield Creek.

We are glad to be able to report that Chancellor is growing very fast these days.

Mr. Landry, the station agent in building north of the depot and the Crown Lumber Co. is erecting an office and living room for their agent, and the National Elevator have built a coal shed next to the Elevator, also a restaurant and rooming house is being built by a chinaman.

Mr. Law is contemplating building a residence to the east of Mr. Bryan's cottage.

Mr. Lightbody, agent of the National Elevator has been succeeded by Mr. R. P. Nelson. Mr. Nelson was intimately connected with the late Mr. C. G. Gibson's family and comes from the same home town.

The local ball team is receiving very enthusiastic support from Mr. Nelson who is an ardent player.

At the organizing meeting of the ball team, Mr. W. Malcolm was unanimously elected manager, and a captain is to be elected at an early date.

RICHARD POSEY CAMPBELL,
the western James Whitcomb Riley
at the Chautauqua.

Craigantler News

I. Desjardine was in his place as usual superintending the annual cattle dip. Everything went off satisfactory.

II. R. Grant and I. Dick made a trip to Calgary and adjoining country north; they report the crops being further advanced from eight miles east of Strathmore and on to the Standard district than any place on their trip.

We believe that the low tide at times around the Cape Stomach has been started on, and might be finished before fall. It is twelve months since the material has been on the spot. The reason for delay is either being a little tired or the horrible defect for improvement, on the party most interested.

J. B. Schreier is well pleased with his new overcoat now. He says it is worth trying on the prairie now, at least he got tired of the long winter and has nearly forgot about it.

Arthur Kirkness is fencing for Mr. Ellis. He has had no spare time lately.

The Craigantler school has closed for the holidays, some schools are keeping on till July 31st.

**A Grade for Every Type of Motor**

IMPERIAL Polarine provides good lubrication for all types of motors and all motor parts. Extreme high engine heat does not affect its body—exactly the right body to seal in compression, conserve power and get the most from fuel. It burns clean.

Imperial Polarine coats and cushions each moving part and follows through at every joint and rub. Reduces wear, makes each part function smoothly and ensures long life and service to your motor.

When you stop for oil ask to see the Imperial Polarine Chart of Recommendations, which shows the right lubricant for your car. It is on display wherever Imperial Polarine is sold.

Gallon and four-gallon sealed cans, steel kegs, half-barrels and barrels. Buy by the barrel and half-barrel and save money. For sale by dealers everywhere throughout Canada.

Help Your Favorite Win The Phonograph

In conjunction with the Rexall Store, we are running a competition at present, the principal prize in which is \$225 phonograph, complete with 250 worth of records. There are also a number of other prizes. The prizes are to be awarded to the candidates who receive the most votes. Purchases at the Rexall Store count 1 vote for every cent. Subscriptions to the Standard count 2500 if from Post Office within 25 mile radius of Strathmore. How outside of that distance, and renewals 1000. The contest closes on August 14.

There are eleven candidates. Taking them alphabetically, they are:

GRACE ANDERSON,
DORIS DOBSON,
JEAN FLEIGER,
DORIS GARDNER.

EDITH MARTIN,
HELEN MILLER, Cheadle,
SARAH MILLER,
ISABEL NEWALL, Nightingale,
FREDERICK SCHAUPELI,
RUTH SIM, Namaka,
ALICE WAT.

You can help your candidate by saving your receipts at the Rexall Store. They count as votes, also subscriptions receipts to the Standard. If you know any in your district who are not subscribers, get their subscriptions. They will thank you afterwards for having put them in touch with a real paper. As a special inducement \$15.00 cash is divided among the two candidates getting the most new subscriptions between June 26th and July 15th.
